■ Fire hydrant installation	■ Foundation excavation & backfill	■ Land clearing, grubbing & stumping
■ Sanitary sewer mains & services	■ Curb, gutter & sidewalk demolition	■ Demolition & site removals
■ Storm drainage & structures	■ ADA curb ramp excavation & prep	■ Site cleanup & final restoration
■ Trench, bedding & backfill		

DIFFERENTIATORS

Tiltrotator-equipped fleet Every excavator in the fleet runs a Steelwrist tiltrotator — full 360° rotation, 40° tilt each way. One machine trenches, sets pipe, trims footings, grades shoulders, and demolishes without repositioning or a second piece on site: fewer machines mobilized, a smaller footprint inside the work limits, faster cycle times, and less restoration to pay for.	Veteran-owned and operated Owned and operated by a USMC veteran. The attention to detail the Marine Corps demands is the standard we hold in the office and in the field. Both owners hold CWU construction management degrees and have estimated and built public works, substation, data center, and commercial projects since — capable, knowledgeable, and exact on the details that decide a job.	Public-works discipline at any size Prevailing wage affidavits, certified payroll, FHWA 1391 and DOT 420-004 reporting, safety plans, submittals, and record drawings prepared in-house.
